Pharmazeutische Präparate Dr. Klaus Hoffmann GmbH & Co. KG  
Pfaffen-Schwabenheim, Germany

Dear Sir or Madam,

We are using your water treatment system and would like to confirm that we are very satisfied with the system.

As a manufacturer of medicines, we are particularly interested in a good water quality. We installed the water treatment system unit in the water pipe before our water distillation on a trial basis. For the test period we stopped the salt-based water softener.

After weeks of trial operation, the water quality remained consistently good, whereas previously fluctuations were observed due to failures of the water softener.

After several weeks, an inspection of the internal heating pipes of our distiller showed no scale deposits, which had previously led to reduced performance and the failure of several cardiac coils.

After these positive results, we have decided to install your water treatment system centrally and hope for continued successful performance.

With kind regards

  
ASTRAPIN
