CHINA RAILWAY SCIENCE AND RESEARCH INSTITUTE

Founded on March 1, 1950, CARS is the only comprehensive research institute with multi-disciplines and multi-specialties in China Railway industry.

It thus has played an important role as the main force in railway sciences and made great contributions to the technological progress of China Railways.

Purpose: To solve the problem of scaling of electric water heater, faucets and shower heads.

To extend the cleaning time of heating rods.
 To improve the heating efficiency.
 To make kitchen dishes easier to clean.
