

BELMONTE LUXURY RESIDENCE

Installation Details

Location: Belmonte Luxury Residence
Ulaanbaatar, Mongolia

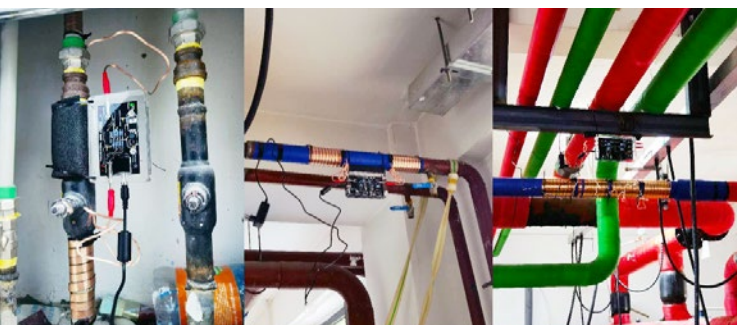

Application: The Vulcan devices have been installed on the four-block buildings of the Belmonte Luxury Residence.

Models:

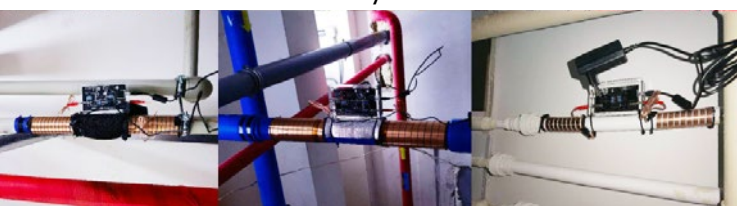

-  2 x Vulcan 5000
-  3 x Vulcan S10
-  2 x Vulcan S25
-  1 x Vulcan S50
-  1 x Vulcan S50

Purpose: The household water supply is not only rusty but also the internal piping systems are clogged due to rust.

Installed by: Live Water Vulcan LLC

Vulcan Anti-Scale System installations.

Vulcan Results

The value of the quality coefficient of the physical treatment of water after the treated water showed a very high result of 92.04%. This shows that the capacity selection of the Vulcan device is suitable for the water treatment of the Belmonte residence.

With the use of the Vulcan Anti-Scale System the water feels softer and the scale problems are reduced. The hard rust inside the pipes become softer and the layers are reduced.
