

LANDHAUS PUCK

Dear Vulcan team,

for over 20 years now, I have been so delighted with this little Vulcan marvel that I wish there were no more limescale in households anywhere.

Our country house used to be mainly an accommodation business for holidaymakers and people passing through, before we now switched to renting out the apartments.

With Vulcan, cleaning the rooms every day has been a real time-saver.
Our water in this region is very hard and full of limescale.

Instead of stubborn limescale stains, the limescale was now in powder form and could be easily cleaned with water and microfiber cloths, without any caustic smelling chemicals!

Our tea and coffee tasted wonderful, as our guests confirmed.
And the water felt much softer, which was a joy when washing the hair.

Thanks to the good service of your company, I was able to continue to operate the Vulcan system by receiving the new power supply and everything is running as usual - lime-free!

Many greetings from Kellenhusen from the Baltic Sea, Germany

Heike Puck
