

# DUO TOWERS PARIS

## Installation details

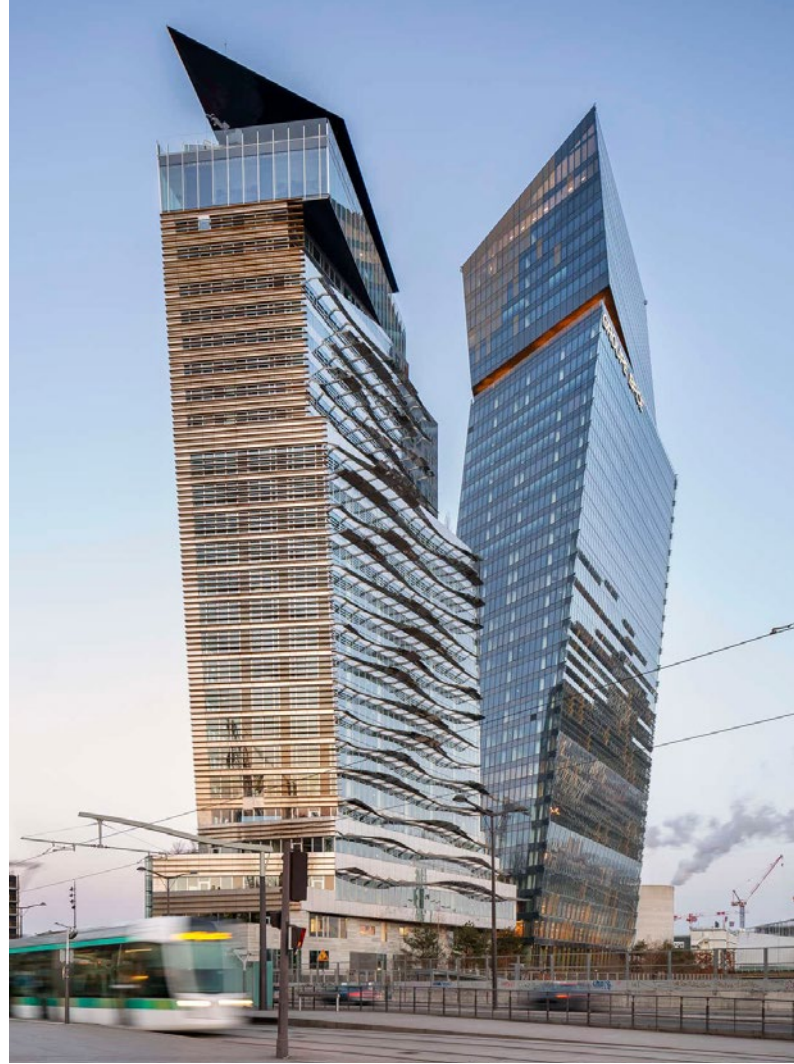

**Application:** Duo Towers in Paris, France

**Models:**  **Vulcan S25**  
Installed in tower 1  
at the main cold water line

 **Vulcan S50**  
Installed in tower 2  
at the main cold water line

**Results:** The towers were new built before few months. The Vulcan units treat the water supply lines of both towers. Until now they did not have any limescale issues.

**Installer:** CWT Preval France

**The Duo Towers are two skyscrapers located in Paris.**

Tower 1: 180 m high, 39 levels, 69.000 m<sup>2</sup> of offices, auditorium, restaurant and shops.

Tower 2: 125 m high, 29 levels, 19.000 m<sup>2</sup> of offices, corporate restaurant, shops, hotel with 139 rooms, restaurant and panorama bar.
