

Installation Details

Location: Kunming Cigarette Factory

www.hyhhgroup.com

Model: **Vulcan** S500

Area: The water inlet of the electric refrigeration equipment

Purpose: 1. Solve the scaling problem of the temperature and humidity control system in the redrying plant.
2. Solve the scaling problem of the cooling circulating water system.

Effects: Before installing Vulcan, had to clean it up every two months with chemicals.

After installing Vulcan, dosing has been stopped for two months:

1. The temperature and humidity control system has no scaling.
2. The circulating water in the refrigeration equipment operates stably.

Kunming Cigarette Factory

The predecessor of Kunming Cigarette Factory was Asia Tobacco Company, which was established in 1922. Now it belongs to Hongyun Honghe Group, a large state-owned enterprise.
