

QINGYUN COMMUNITY

Located in Qingyun Street, Dalian. It covers an area of 58,600 square meters and a building area of 100,000 square meters.

Installation details

- Model: Vulcan 3000
- Location: A family in Qingyun Community
- Area: Main household water pipeline
- Installed by: Jiayifang

Observation

After installing Vulcan for 1-2 days, the family found that the water became very smooth, the skin felt very comfortable and not tight after showering and the clothes were softer after washing.

After 1-2 months, it was found that especially the white clothes were brighter; they became yellow quickly without Vulcan before. The kitchen and bathroom were easier to clean, it reduced a lot of physical cleaning efforts.

Vulcan 3000 was installed on the main water pipe at the stairway for a residence.
