

The Electronic Anti-Scale System

Private Houses and Villas

German Technology
Absolutely Magnetism-Free

No Salt
No Chemicals
No Maintenance

The eco-friendly alternative to water softeners

Hard water contains dissolved limescale which can cause deposits in your pipes and appliances. Hard water interferes with the action of soaps and detergents leading to deposits in pipes, heating elements and other equipment.

RO systems and water softeners remove almost all minerals, what is not good for drinking and cooking, plus there are recurring expenses and waste water to deal with. Vulcan is the eco-friendly and maintenance-free alternative, without using salt or chemicals and preserves the value of your home today and for the next generation.

Benefits of using Vulcan

- ▶ Vulcan is an eco-friendly alternative to RO and water softeners
- ▶ Reduces of scale deposits in the whole piping system
- ▶ Less time and effort on household maintenance and cleaning
- ▶ Reducing spotting on glasses, dishware and tiles
- ▶ Considerable savings on cleaning agents
- ▶ Filters, shower heads and basins stay clean longer
- ▶ Fulfil the Green Building standard for water treatment

Sprinklers and gardening systems stay clean and last longer. Less replacements are required.

Swimming pools are easier to maintain and pool filters stay cleaner. Chemicals and cleaning agents can be reduced.

Vulcan - Impulse - Technology

The Vulcan - Impulse - Technology treats the water with special electronic impulses that take away the adhesive power of the scale particles. Scale components are simply washed away with the water as a fine powder. Vulcan carefully dissolves already existing deposits. In addition, the Vulcan impulses generate a metal-carbonate protective layer that prevents rust and pitting corrosion.

Simple Do-It-Yourself installation

Vulcan is a Do-It-Yourself product and is easily installed within a few minutes without the need to cut the pipes. To install Vulcan you do not need any professional tools. Install Vulcan at the main water supply, close to the water meter.

Fulfil the Green Building Standard

Vulcan is maintenance-free and does *not* change the water composition. It leaves calcium and magnesium in the water which are important minerals for the human body.

Vulcan is the eco-friendly water treatment for green buildings and homes that aims to help building owners and operators be environmentally responsible and use resources efficiently.

„First of all, I would like to say that due to the high hardness of 21°DH in our drinking water, I have been looking for a salt-based water softener system firstly. In the house, which is only four years old, considerable signs of calcification have already become noticeable. Until now, it seemed that only a water softener could be effective. However, this technology was considered very critical for various reasons, so I started looking for alternatives. In the media, alternative technologies were rather warned against, so that skepticism had set in. By research, I became aware of the Vulcan technology. The objective marketing and the offer to test the system for six weeks for free convinced me to test it in my home.

The installation: The device was delivered in a professional packaging and made a serious, high-quality impression. The installation was very easy and quick, especially due to your photo and video instruction.

About the test operation: Before the installation, visible limescale deposits, e.g. on faucets or in the kettle, were reduced in order to better identify any deposits. The effect of the system took some getting used to at first. Limescale continued to precipitate in the kettle, for example, but it was comparatively easy to remove with a metal sponge. We have made the impression that limescale was also loosed out in other areas, and only a slight layer could be easily removed with a simple cloth. Overall, I am very satisfied with the unit. The trial period was a great service, for which I would like to thank you again!"

Prevents Scale and Rust

- ✓ Reduction of existing scale in the piping system
- ✓ Installation without cutting the pipe
- ✓ From 1/2" up to 40" pipe diameter
- ✓ Works on all pipe materials – iron, copper, plastic, stainless steel, PVC, compound pipes, PE-X, etc.
- ✓ 100% maintenance-free
- ✓ Eco-friendly solution without salt or chemicals
- ✓ Prolongs life of machinery and equipment
- ✓ Important minerals remain in the water
- ✓ Long life – fully cast in acrylic
- ✓ 25 year international warranty

Quality — Made in Germany

- ▶ Manufactured by Christiani Wassertechnik GmbH (CWT) in Germany
- ▶ Over 40 years of experience in physical water treatment
- ▶ Successful in more than 70 countries worldwide
- ▶ 25 years international warranty
