The Electronic Anti-Scale System for Water Works

No Salt
No Chemicals
No Maintenance

German Technology
Absolutely Magnetism-Free

Vulcan – The chemical-free solution

Scale deposits reduce the effectiveness and increase the operating costs of water works. The Vulcan water treatment system is the eco-friendly and chemical-free alternative.

Improving water works operation by:

- ▶ Gently reducing existing scale deposits
- ▶ Maximizing filter cycles
- ▶ Reducing water consumption and wastage
- ▶ Reducing energy consumption
- ▶ Maximizing life of pipes and pumps
- ▶ Reducing maintenance, repairs and replacements

The 3 Vulcan Effects

1. Vulcan modifies the crystallization of the calcium. The scale loses its adhesive power and is washed away with the water as a fine powder.
2. Vulcan carefully dissolves existing incrustations in the piping system. Only a thin protective layer remains in the pipe.
3. Vulcan generates a controlled electrophoresis process, which produces a protective metal-carbonate layer. It acts as protection against rust and corrosion.

"Even after approximately 6 months, almost no scale build-ups were observed. Small amount of scale was easily removed with a finger. With these results, we can confirm the effectiveness of Vulcan."

Vulcan Prevents Scale and Rust

- ✓ Reduction of existing scale in the piping system
- ✓ Installation without cutting the pipe
- ✓ From ½" up to 40" pipe diameter
- ✓ Works on all pipe materials – iron, copper, plastic, stainless steel, PVC, compound pipes, PE-X, etc.
- ✓ 100% maintenance-free
- ✓ Eco-friendly solution without salt or chemicals
- ✓ Prolongs life of machinery and equipment
- ✓ Important minerals remain in the water
- ✓ Long life – fully cast in acrylic
- ✓ 10 year international warranty

Quality - Made in Germany

- ▶ Manufactured by Christiani Wassertechnik GmbH (CWT) in Germany
- ▶ Over 30 years of experience in physical water treatment
- ▶ Successful in more than 70 countries worldwide
- ▶ 10 years international warranty
